

Instructions for My Drawzit Snowman

Matthew 15B

1. I first went to the fill bucket and then made the background light blue. Color number #0099ff and then made a large circle with a black outline. The line size is 1. The fill color is white and the circle has a diameter of 2 & $\frac{1}{4}$ in. I put the snowball $\frac{1}{2}$ in. above the bottom of the screen in the middle. I next made another circle with the same fill and outline size and color as the first one with a diameter of 1 & $\frac{1}{2}$ in. and put it on top of the first snowball. Then I made a circle with the same fill and outline size and color as the second and first snowball. The diameter of the third snowball should be 1 in. I then put the third snowball on top of the second snowball.
2. I next went to shapes and chose a line and used the line to make a right hand coming out from the middle ball (facing it) of a length of 1 & $\frac{1}{4}$ in. The thick size should be 1 and the line should be black. I then made another 1 & $\frac{1}{4}$ in. line and put it on the left side of the snowman (facing it). Both of the lines should be going up at an angle. I then made 3 little $\frac{1}{4}$ in. lines coming out of each side of the hand, left hand and right hand. I then made a brown tree that was 4 in. tall and was $\frac{3}{4}$ in. long. The tree should be $\frac{1}{2}$ in. above the ground. I then made a line coming from the left of the snowman to the edge of the page. The thick level is 6. It should be about 3 in. long.
3. Next I made a 3 & $\frac{1}{4}$ in. from the tip of the tree to the bottom of the snowman's bottom ball. With the thick level at 6 from the tree and was 1 in. above the ground.
4. I next chose pencil and chose green (#006600) as the color. I next made the tree top free handed.
5. I made six red apples by choosing different sizes of circles and putting them on the tree top.
6. I then made a 1 & $\frac{1}{2}$ in. line with 11 as the thick size above his head.
7. I next made a 1 in. by 1 in. square and put it on top of the 1 & $\frac{1}{2}$ in. line.
8. I then made a yellow line with 11 as the thick and put it on top of the bottom of the square.
9. I then made a $\frac{1}{2}$ in. by $\frac{1}{2}$ in. square and put it in the middle of the yellow line. The square should be black.
10. I then made a smaller square, $\frac{1}{4}$ in. by $\frac{1}{4}$ in. and put it in the middle of the $\frac{1}{2}$ in. by $\frac{1}{2}$ in. square. The square should be yellow.
11. I then made earmuffs by making $\frac{1}{4}$ in. tall ovals and put them on each side of his head. Make sure the ovals are touching the hat and his head.

12. I next made a $\frac{1}{4}$ in. tall button and put it $\frac{1}{2}$ in. above the bottom tip of the second snowman's ball. I then made another button that was $\frac{1}{4}$ in. tall and put it $\frac{1}{4}$ in. above the first button. I then made another button just like the first and second button and put it $\frac{1}{4}$ in. above the second button (going upward).
13. I then went to shapes and chose the triangular shape. I made a $\frac{1}{4}$ in. long nose. The nose should be orange. I stuck the nose right in the middle of the snowman's top snowball, his head.
14. I then made two eyes and put them on the top ball and had a vertical, or tall, length of $\frac{1}{4}$ in.
15. Next I made a mouth by choosing the pencil tool and the line level is 1. I made the mouth by making a stretched out U. It should be a black line.
16. I then made some red shoes coming from the bottom circle. One going left and one going right. The shoes lengths are about $\frac{3}{4}$ in. The shoes should look like L's.
17. I finally chose the line with 4 as the thick level and put three of them on each shoe. The lines were coming from the top to the bottom but not touching the very bottom of the shoes.
